

Workshop Medical Microtechnology, April 28th 2022

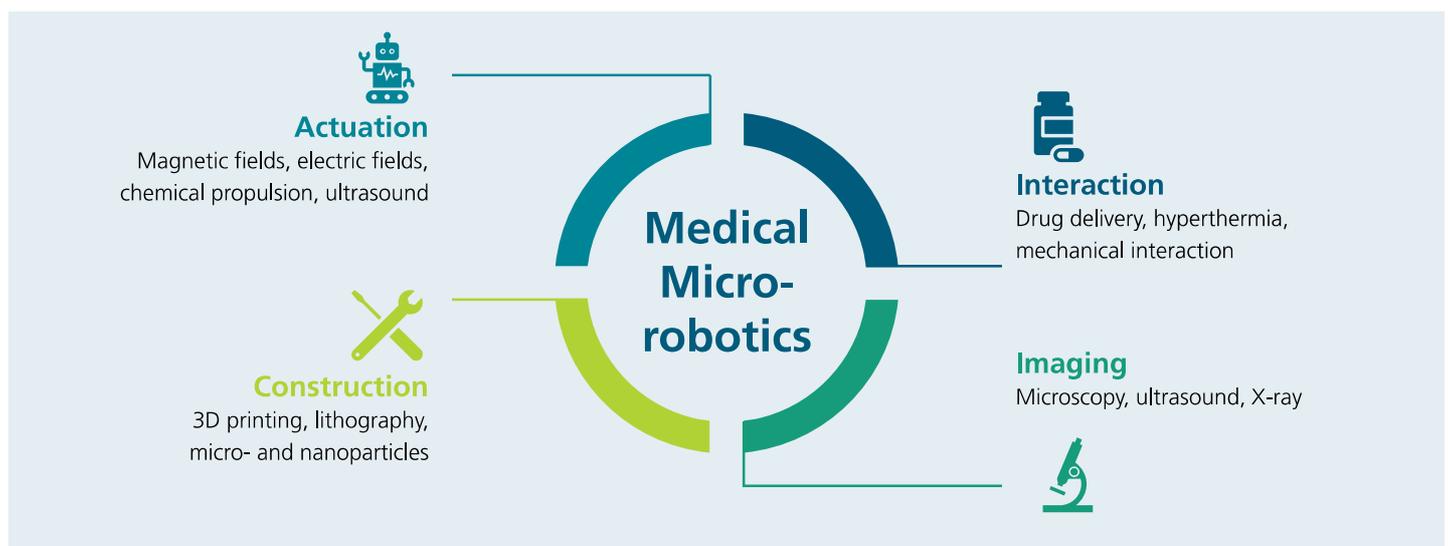

Magnetic Microrobotics meets MPI: Imaging, Applications and Vision

Justin Ackers M.Sc. — justin.ackers@imte.fraunhofer.de

Introduction

The wide field of Microrobotics

Introduction

Microswimmer developed in Lübeck

Imaging

MPI

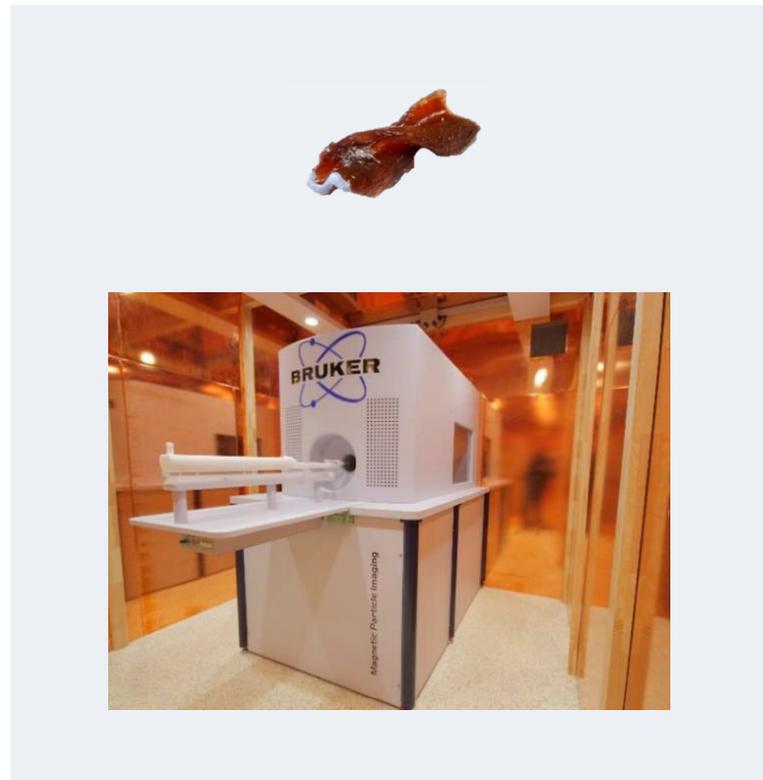

Magnetic Particle Imaging

Tomographic, real-time imaging of magnetic nanoparticles using magnetic fields

— Bruker 25/20 FF preclinical MPI system

Same field topologies as needed for magnetic actuation

Manufacturing

3D printing and magnetic coating

Basic structure printed with FormLabs Form2

Helical shape inspired by savonius turbines

Magnetic coating with

→ superparamagnetic iron oxide nanoparticles (SPIONs)

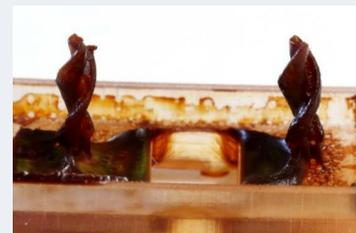

→ NdFeB particles

SPIONs

NdFeB particles

Actuation

Steering in the imaging phantom

Magnetic fields generated by the MPI system

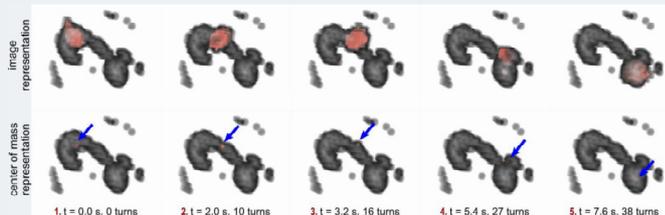

→ Homogeneous rotating magnetic fields

Pre-planned trajectory

Navigation in cerebral aneurysm phantom successful

Center of mass localization:

→ accuracy of 0.7mm achieved

Bakenecker *et al.* Navigation of a magnetic micro-robot through a cerebral aneurysm phantom with magnetic particle imaging. *Sci Rep* **11**, 14082 (2021)

Interaction

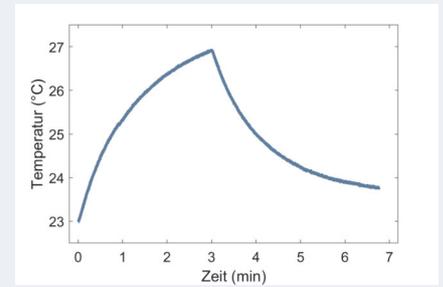

Hyperthermia

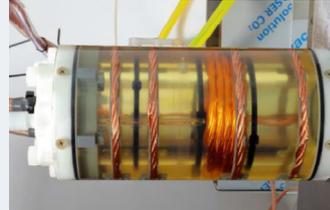

High frequency magnetic fields can heat the device

Induce coagulation and treat the aneurysm

Integration into MPI system as theranostic platform possible

Temperature increase of swimmer in experimental setup

Hyperthermia insert for the Bruker MPI

Vision for the future

Construction

Biocompatibility

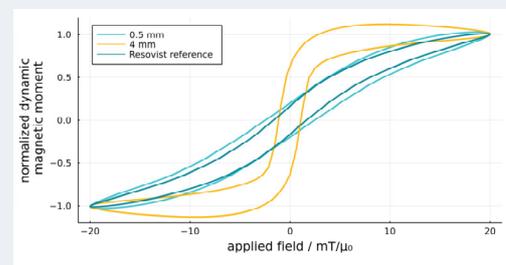

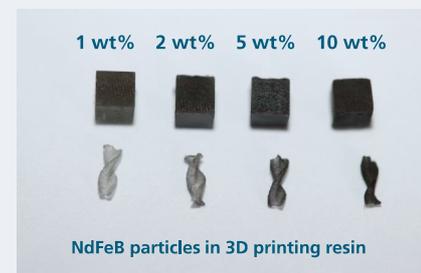

NdFeB and the used printing material are not safe

Miniaturization

Two photon polymerization enabling smaller dimensions

Smart Materials

Incorporate magnetic properties in the printing materials
Improve MPI performance with alternative materials

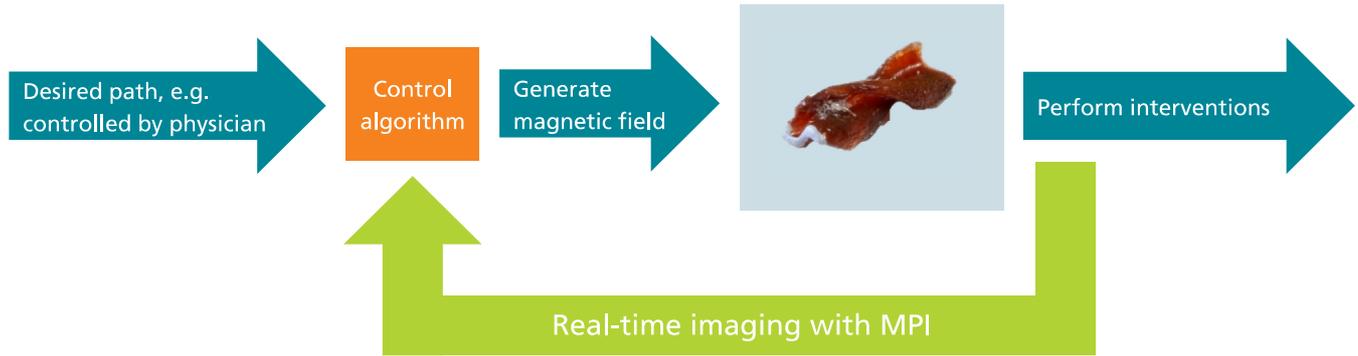

Improved MPI performance of ferromagnetic needles

Ackers *et al.* Printing of hard ferromagnetic materials for remote magnetic actuation. *Trans. AMMM* **2.1**, 567 (2021)
Ackers *et al.* MPI of soft ferromagnetic needles. *IJMPI* **8.1**, Suppl. 1 (2022)

Vision for the future

Closed loop actuation

Thank you for your attention!
Questions, please!
